

Ask questions which have many solutions. Add or remove constraints.	<b>Different perspectives</b>	Have students explore different points of view in the task.
<b>Many solutions</b>	<b>From closed to open</b>	<b>Many entry points</b>
Ask for one problem to be solved in multiple ways.	<b>Many pathways</b>	Have students work backwards by beginning with the outcome.

Ask questions which have many solutions. Add or remove constraints.	<b>Different perspectives</b>	Have students explore different points of view in the task.
